NEW BUDDLEIA ALTERNIFOLIA.—This splendid NEW SHRUB is the hardiest Butterfly Bush yet introduced, as it does not freeze down like other Buddleias. A rare gem from China. A most charming and distinct sight with its long arching branches covered with lilac purple flowers from mid-summer until late fall. We predict it a great future when better known. NEW MOERHEIMI BLUE SPRUCE.—This is a new and wonderful improvement of the famous Kusters Blue Spruce, with dazzling silver-blue needles and perfect form without trimming. Bluest of all. Nationally advertised. Strong winter grafted plants from 2½ inch pots for Spring delivery, \$7 00 per 10; \$60 per 100; \$500 per 1000; \$4,000 per ten thousand. Strong plants grafted last winter and planted in beds Spring, 1930, \$8.50 per 10; \$75.00 per 100; and \$650.00 per 1000.

PLANTING ADVICE: It is very important that all grafts for Moerheimi and Kusters Blue Spruce be planted with union of grafts below the surface of the soil. They will then make root of their own from the lower part of the scions, thus making a much more vigorous plant. Failure to comply with this advice may bring you heavy loss in transplanting. Give them, if possible, a sandy soil mixed with peat moss.
